Work Experience

Uber Clone (Frontend Development (React))

- Designed and developed User & Captain forms with form validation
- Integrated backend endpoints with React using Axios + Context/State
- Built User Home Screen UI with live location search, suggestions panel, and map integration
- Built Captcha-to-end integration of user ↔ backend ↔ captain
- Championed marketing efforts for St. Thynk Unlimited

Backend Development

- Set up Node.js + Express server and created user and captain authentication modules
- Implemented register, login, logout, and protected routes using AuthUser middleware
- Built APIs for rides, suggestions, getCoordinates, distanceTime, etc. Enabled Google Maps API integration for search, autocomplete, and distance calculations
- Created backend logic for ride creation, status updates, and user-captain interaction

Zoom Clone

- “Real-time Zoom-like video app using WebRTC, Socket.IO & React with meetings, chat, and screen sharing.”
- **Zerodha Clone:**
- “Trading dashboard clone with authentication, charts, order placement & market data integration (MERN).”
